

Annual Management Report of Fund Performance As at October 31, 2007 Front Street Canadian Equity Fund Class

This Annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements for Front Street Canadian Equity Fund, a class of shares of Front Street Mutual Funds Limited fund (the "Fund"). The annual financials of the Fund are attached behind this report and you can also get a copy of the interim or annual financial statements at your request, and at no cost, by calling 1-800-513-2832, by writing to us at Front Street Capital 2004, 33 Yonge Street, Suite 600, Toronto, Ontario M5E 1G4 or by visiting our web site at www.frontstreetcapital.com or SEDAR at www.sedar.com

Security holders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure relating to the Fund.

Forward Looking Information

This Annual Management Report of Fund Performance contains forward-looking information and statements relating, but not limited to, anticipated or prospective financial performance and results of operations of the Fund. Forward looking information involves known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. For this purpose, any statements that are contained herein that are not statements of historical fact may be deemed to be forward-looking information. Without limiting the foregoing, the words "believes", "anticipates", "plans", "intends", "will", "should", "expects", "projects", and similar expressions are intended to identify forward-looking information.

Although the Fund believes it has a reasonable basis for making the forecasts or projections included in this Annual Management Report of Fund Performance, readers are cautioned not to place undue reliance on such forward-looking information. By its nature, the forward-looking information involves numerous assumptions, inherent risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts and other forward-looking statements will not occur. These factors include, but are not limited to, those associated with the performance of the equity securities market, expectations about interest rates and factors incorporated by reference herein as risk factors.

The above list of important factors affecting forward looking information is not exhaustive, and reference should be made to the other risks discussed in the Fund's filings with Canadian securities regulatory authorities. The forward looking information is given as of the date of this Annual Management Report of Fund Performance, and the Fund undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise.

Management Discussion of Fund Performance

Investment Objective and Strategies

The Fund's investment objective is to provide securityholders with long term capital growth through the selection, management and strategic trading of long and short positions in equity, debt and derivative securities. The Fund will invest primarily in Canadian equities and may focus its assets in specific industry sectors and asset classes based on analysis of business cycles, industry sectors and market outlook. The Fund may also invest in foreign equities.

The Fund's Investment Advisor, Front Street Investment Management Inc., may also consider non-investment factors such as cash flow and liquidity requirements, hold periods and restrictions, risk factors, stop-loss containment and tax efficient distributions.

The Front Street Canadian Equity Fund's portfolio will consist primarily of investments which generate capital gains, but will also include investments which generate income. In managing the portfolio, the Investment Advisor intends to use strategies including: investing in undervalued securities, short selling overvalued securities, managing long/short positions, pairs trading, trading in securities of distressed issuers, special warrant arbitrage, merger arbitrage, convertible arbitrage, and participation in restructurings.

From time to time the Fund may invest in other mutual funds and may purchase securities of, or enter into specified derivative transactions for which the underlying interest is based on the securities of other mutual funds. Such investments may be entered into in conjunction with other strategies and investments in a manner considered most appropriate to achieving the Fund's investment objectives stated above and enhancing returns as permitted by securities regulations.

Risk

Most of the Fund's assets will be invested in common shares and other equity securities. The Fund will therefore be subject to stock market risk. The Fund may also invest in foreign securities that may expose the Fund, to a limited extent, to the risk of investments in foreign securities and foreign currency risk. The Fund may invest in relatively illiquid securities that may expose the Fund to liquidity risk. The Fund may also be exposed to sector risk due to its investments being concentrated in a limited number of sectors. The Fund may also be exposed to the risks of selling securities short, the risks of investing in derivatives, and the risk associated with investing in securities of junior industrial, technology and natural resource companies.

Currency risk proved to have an effect on the Fund's returns, as the Canadian dollar strengthened, relative to the U.S. dollar, over the year. Currency risk impacted principally the Fund's investments that had revenue in U.S. dollars. Volatility in currency markets continues to be high, suggesting uncertainty going forward on this front.

Equity risk also affected Fund volatility. Specifically, the threat of oil-supply disruptions kept the price of oil high. While market volatility was high overall, the high price of commodities was a positive factor that contributed to Canadian equity market performance, particularly in the materials sector.

Interest-rate risk was also a factor, as global central banks and bond and equity markets closely monitored the U.S. Federal Reserve's monetary policy activities and public communications for indications as to when the current cycle of monetary policy tightening may be ending. As higher borrowing costs tend to slow the economy, rising interest rates tend to have a negative impact on the outlook for corporate-profit growth and therefore equity market performance.

Credit risk was another factor this year. Specifically, a weakening housing market in the United States finally became a crisis in August of 2007 as assets backed by sub prime mortgages collapsed, impacting global debt and equity markets. As the autumn progressed, the vicious circle caused by deteriorating credit impacted commercial banks -- holders of bonds and other securities backed by home loans. As a result, lending has been curtailed and the cost of money is higher. Although the Fund did not hold the debt in question, equity markets have been weak due to the general uncertainty and the fact that global growth could decelerate into 2008 as liquidity dries up.

The Fund has multiple risks associated with equity markets. Investors whose primary concern is preservation of capital should not be invested in this Fund. The Fund is suitable for investors seeking long-term growth with a high tolerance for risk and volatility and a long-term investment horizon.

The risks of investing in the Fund are further discussed in the Fund's Annual Information Form dated June 13, 2007.

Results of Operations

The Investment Advisor continued to focus on long-term capital appreciation for the portfolio during 2006 and the early part of 2007. Sector allocation to the materials and energy sectors significantly contributed to the returns for the year. Company concentration was not evident as the Investment Advisor continued its long-standing commitment to a diversity of names while maintaining a focus on the sectors that had high appreciation potential.

Interest rate increases had only a slight negative impact for the Fund. Currency volatility also had a slight negative impact as revenues denominated in U.S. dollar declined when converted to Canadian dollar on most investee company's income statements.

Recent Developments

The Fund anticipates that volatility will continue in the equity markets for the foreseeable future. The perception exists that inventory levels are tight in most commodity groups leading to an inability to cushion any shocks to the system. Despite this, and even with a changing interest rate and credit environment, economic growth has continued unabated.

Adoption of New Accounting Standards

Effective November 1, 2006, the Fund has adopted Section 3855, "Financial Instruments – Recognition and Measurement" of the CICA Handbook – Accounting, issued by the Canadian Institute of Chartered Accountants ("CICA"), which establishes standards for the fair valuation of investments as well as the accounting treatment of transaction costs. Additionally, Section 14.2 of National Instrument 81-106 ("NI 81-106"), issued by the Canadian Securities Administrators in 2005, requires the daily net asset value of an investment fund to be calculated in accordance with Canadian generally accepted accounting principles ("GAAP").

Related Party Transactions

The Fund may place a portion of its portfolio transactions with brokerage firms which are affiliates of Front Street Mutual Funds Limited, the manager of the Fund, and the Investment Advisor, provided it determines that these affiliates' trade execution abilities and costs are comparable to those non-affiliated, qualified brokerage firms, on an execution-only basis. For the year ended October 31, 2007, Tuscarora Capital Inc. received \$25,885 in commission on portfolio transactions for the Fund.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance since inception. This information is derived from the Fund's audited annual financial statements.

FRONT STREET CANADIAN EQUITY FUND CLASS SERIES A

FOR THE YEARS ENDED	October 31, 2007	October 31, 2006	October 31, 2005	October 31, 2004	October 31, 2003

Net asset, end of year (7)	12.15	9.98	-	-	-
-----------------------------------	-------	------	---	---	---

Ratios and Supplemental Data Series F

Net assets (000's) ⁽³⁾	4,474	241	-	-	-
Number of shares outstanding	368,183	24,168	-	-	-
Management expense ratio ⁽⁴⁾	4.05%	9.38%	-	-	-
Management expense ratio before waivers or absorptions	4.05%	9.38%	-	-	-
Portfolio turnover rate ⁽⁵⁾	310.74%	156.19%	-	-	-
Trading expense ratio ⁽⁶⁾	1.31%	0.67%	-	-	-

- (1) Net asset and distributions are based on the actual number of shares outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period.
- (2) Distributions were paid in cash and/or reinvested in additional shares of the Fund.
- (3) This information is provided as at period end of the year shown.
- (4) Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net assets during the period. In the period a series is established, the management expense ratio is annualized from the date of inception to October 31.
- (5) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- (6) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.
- (7) The relief granted by the Canadian securities regulatory authorities from complying with Section 3855 results in a difference between GAAP NAV and Transactional NAV due to the use of different valuation techniques for certain investments. We have adopted the provisions of Section 3855 retroactively without restatement of prior periods. Accordingly, the beginning of period net asset for the current period is adjusted.

Management and Performance Fees

The Fund pays the Investment Advisor a monthly fee equal to one-twelfth of 2.5% of net asset value of the applicable series of the Fund, payable monthly in arrears, calculated without regard to any accrual of performance bonuses (as described below) and before payment of such fee.

The Investment Advisor may earn an annual performance bonus (a “Performance Bonus”) in each fiscal quarter if the percentage gain in the new asset value of a series of the Fund (as adjusted for any prior return deficiencies) over the preceding calendar quarter or quarters since a performance fee was last payable exceeds the percentage gain or loss of the benchmark over the same period. The benchmark for the Fund is the S&P/TSX Composite Index (the “Index”).

The fee will be equal to this excess return per security multiplied by the number of securities outstanding at the end of the quarter multiplied by 20%, provided that the net asset value per security of the Fund (including distributions) is greater than all previous values at the end of each previous calendar quarter. The starting reference point for the next calendar quarter’s calculation will be based on the higher of either the Index performance adjusted net asset value per security or the adjusted actual net asset value per security, both with respect to the previous quarter in which a performance fee was payable.

Dealer Compensation

Brokers, dealers and advisors may be paid a share of the management fee – called a “trailer commission”, for assets that their sales representatives place in the Series A and Series B Fund securities. The Fund may, at its discretion, negotiate, change the terms and conditions of, or discontinue the trailer commission with brokers, dealers and advisors.

The trailer commission is calculated as a percentage of assets each broker, dealer or advisor has placed in the Fund series. The trailer commission is calculated based on the closing balance of client accounts for each calendar month. The trailer commission will not be paid if the assets are removed from the Funds. Trailer commissions are paid quarterly at rates set within ranges according to the following table.

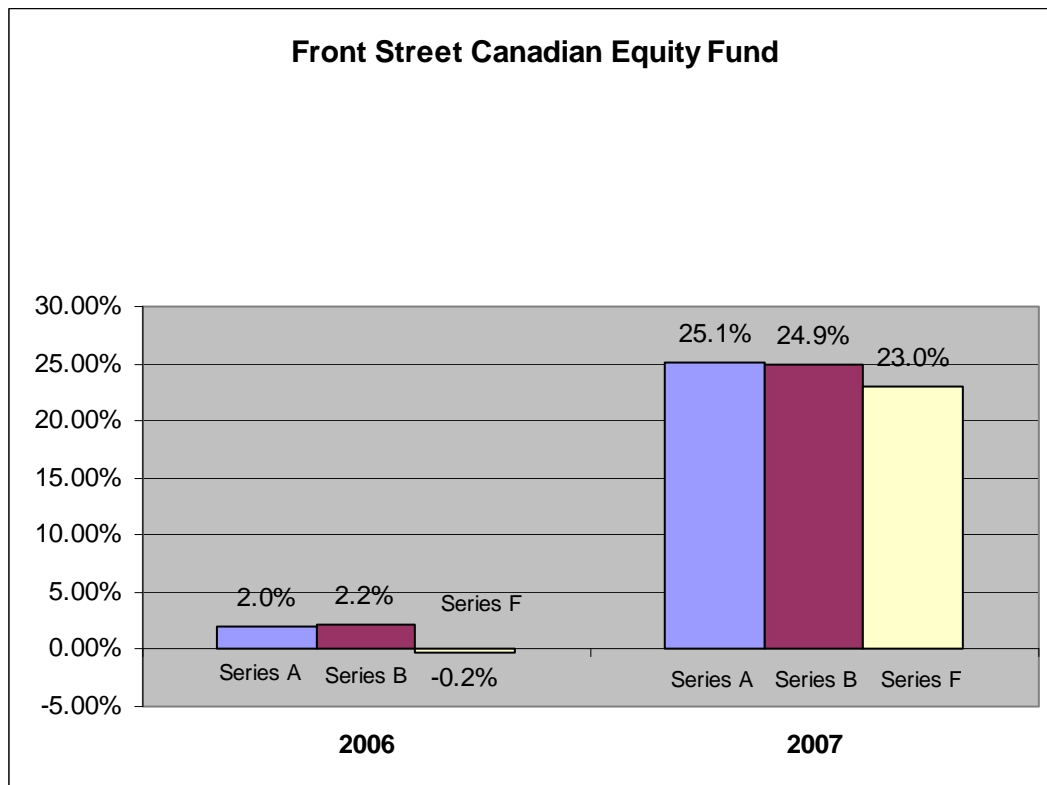

Series	Trailer Annual Rate	Annual Payment per \$1,000 of Fund securities held
A	1.00%	\$10.00
B	1.00%	\$10.00
F	0.00%	Nil

Past Performance

The past performance of the Fund is set out below and includes year-to-date returns.

With respect to the charts displayed below, please note the following:

- (a) the returns or performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional shares of the Fund;
- (b) the return or performance information does not take into account sales, redemption, distribution or other optional charges or income taxes payable that would have reduced returns or performance; and
- (c) how the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Annual Compound Returns

The following table shows the Fund's historical annual compound total return and year-to-date return since inception, as compared to the performance of the S&P/TSX Composite Index (the "Index").

	Since Inception June 28, 2006
Front Street Canadian Equity Fund Series A	27.51%
S&P/TSX Composite Index	29.06%
	Since Inception June 22, 2006
Front Street Canadian Equity Fund Series B	27.64%
S&P/TSX Composite Index	31.40%
	Since Inception August 3, 2006
Front Street Canadian Equity Fund Series F	22.71%
S&P/TSX Composite Index	22.52%

The Index is a float market capitalization that tracks the performance of some of the largest and most widely held Canadian stocks listed on the Toronto Stock Exchange. Prior to May 1, 2002, this index was called the TSE 300 Composite Index.
